FOR IMMEDIATE RELEASE

**Triangle MicroWorks, Inc. Announces Acquisition of Tamarack Consulting, Inc. is Now Complete**

RALEIGH, N.C., March 21, 2008 – Triangle MicroWorks, Inc., a Raleigh, North Carolina, based provider of Communication Protocol products for support of DNP3, IEC 60870-5, and Modbus, announced today that it has acquired all of the assets of Tamarack Consulting, Inc.

Jim Coats, President of Triangle MicroWorks said, “Beginning in January of this year we have been working closely with Tamarack Consulting in order to complete this acquisition and capitalize on the strengths of both organizations. We are very pleased to announce that we have completed this acquisition, which represents a strategic move into IEC 61850 for Triangle MicroWorks. It gives us a broad knowledge of IEC 61850 and a strong code base to support it. The creation of merged tool sets and a more comprehensive integration strategy will benefit the entire industry.”

Tamarack also believes that this transaction will allow their current customers to be better served. “The combined organization will be much stronger in marketing, product development, and support, since the organizations are so complementary,” said George Schimmel, President of Tamarack. Mr. Schimmel will continue to play a key role in merged corporation taking the position of Chief Technology Officer.

**About Triangle MicroWorks, Inc.**

Triangle MicroWorks, Inc., is a privately held corporation based in Raleigh, North Carolina, and began operations in 1994 with a goal to provide tools for communication protocol development focused on the electric utility industry. Currently, it provides Communication Protocol Software Libraries, PC-based Master/Outstation Protocol Simulation Software, Conformance Test Software, Communication Protocol Training Videos, OPC drivers, and Protocol Gateways for industry-standard communication protocols such as DNP3, IEC 60870-5, and Modbus.
